

Managing Risk in Primavera Risk Analysis Rel. 8.6 Training

ORACLE'S PRIMAVERA RISK ANALYSIS is a full lifecycle risk analysis solution integrating cost and schedule risk management. Primavera Risk Analysis provides a comprehensive means of determining confidence levels for project success together with quick and easy techniques for determining contingency and risk response plans.

This course provides training for Primavera's Risk Management Solution. Participants will gain a thorough background in the basic concepts of risk management. This three-day class leads you through examples of specific risk modeling techniques and provides a lab-style workshop on the third day to allow students to apply the learned techniques.
